CLOUD DEVOPS ENGINEERING COURSE WITH AI

This Cloud Computing & DevOps course is designed to help you gain expertise in both cloud computing and DevOps domains. It offers hands-on experience through real-world projects and practical assignments covering AWS, DevOps, Azure, GCP and more. As part of the program, you will receive placement support until you secure a job, with eligibility for the placement pool upon successfully clearing the Placement Readiness Test (PRT). This course aims to prepare learners to become certified Cloud & DevOps Architects, equipping them with industry-leading tools and technologies, including Linux, AWS, GCP, Azure, Terraform, Kubernetes, Python, and AI Skills.

Hottest **Job of 21st Century**

1.1 Million Job Opportunities

The global demand for Cloud Computing and DevOps professionals is projected to reach 1.1 million job openings by 2026.

Future-Proof Career

As a rapidly growing field, Cloud Computing & DevOps offers long-term career stability and growth.

Preferred Qualification

43% of professionals in this domain hold a Master's degree, highlighting its significance in the tech industry.

In-Demand Skills

Cloud & DevOps professionals acquire industry-relevant skills that open doors to high-paying job opportunities.

Expanding Industry

The Cloud Computing & DevOps industry is expected to grow at a 22% CAGR globally by 2030.

Rising Job Market Demand

By 2022, India and the US faced a 4,60,000 professional shortage in Cloud & DevOps roles, emphasizing the increasing demand for experts in the field.

LMS Learning

Pre-recorded & AI Learning Videos

Key Highlights

- ✓ 208 Hrs of Self-Paced Learning
- ✓ 6 months of Live Sessions from Industry Experts
- ✓ Dedicated Career Services Sessions
- ✓ Pre-recorded & AI Learning Videos
- ✓ One-on-One with Industry Mentors
- ✓ Suitable for Technical as well as Non-technical Graduates
- ✓ 30+ Industry Projects & Case Studies
- ✓ Essential Soft Skills Training
- ✓ 24*7 Support
- ✓ Revision & Doubt Clearing Sessions on Weekends
- ✓ Certification from CloudBlitz
- ✓ Job & Placement Support
- ✓ Mock Interview Sessions
- ✓ Dedicated Learning Management Team
- ✓ Weekly Yoga & Meditation sessions
- ✓ Free Communication sessions

Program Pedagogy

Instructor led Training

Get trained by top industry experts

Technical Support

Speak to Subject Matter Experts anytime and clarify your queries instantly

Self-paced videos

Learn at your own pace with world-class content

Projects and Exercises

Get real-world experience through projects

Hackathons

Get a sense of how real projects are built

Peer Networking and Group Learning

Improve your professional network and learn from peers through our innovative Peer Chat tool

Gamified Learning

Get involved in group activities to solve real-world problems

1:1 Personalized Learning

Hands-on exercises, project work, quizzes and capstone projects

Who Can **Apply** for the **Course?**

- ✓ Individuals who have pursued B.E., B.Tech, B.Sc, BCA., M.E., M.Tech, B.Com, M.Com, M.Sc., and MCA.
- ✓ College students in the last year of their graduation or post-graduation or fresh graduates.
- ✓ Any working professional up to 35 years old.
- ✓ Anyone looking for a career transition to Cloud computing and DevOps.
- ✓ Candidates with an annual salary of less than 7 lakhs
- ✓ Candidates from Technical and Non-Technical domains can apply

Application **Process**

The application process consists of three simple steps. Candidates have to submit their applications. An offer of admission will be made to the selected candidates and their application will be accepted upon the payment of the admission fee.

SUBMIT APPLICATION

Degree Career Support: Your Complete Path to Success

CLOUDBLITZ

1. Start Strong: Enrollment

Begin your career journey by enrolling in our comprehensive program, designed to provide full support from day one. This sets the foundation for everything you need to succeed.

2.Active Learning: Attendance, Assessments & Assignments

Stay committed with regular attendance, engaging assessments, and hands-on assignments that ensure you're continuously building the skills necessary for your field.

3.Mastering Soft Skills: Communication & Professionalism

Develop key soft skills that employers value:

- Master professional email etiquette
- Enhance written and verbal communication
- Build interpersonal skills that boost collaboration and workplace success

4.Hands-On Training: 80% Practical, 20% Theory

With a strong focus on practical learning, 80% of the program involves real-world application. The remaining 20% is essential theory that depends your understanding and supports your practical skills.

5.Reinforce Your Knowledge: Revisions

Regular revision sessions ensure you fully grasp concepts and stay prepared for future challenges. This step solidifies what you've learned and keeps you on track for success.

6.Mock Interviews: Real-World Job Prep

Get interview-ready with mock interview sessions. These simulations help you build confidence, refine your responses, and prepare for real-world job interviews, ensuring you're polished and ready from every angle.

7. Polish Your Profile: Resume Preparation

Learn to create a high-impact resume that grabs the attention of recruiters and hiring managers. Our experts guide you to showcase your skills, achievements and career goals in the most professional way.

8. Boost Your Visibility: Job Portfolio Development

Build a strong digital presence on platforms like Naukri, LinkedIn and other job portals. This boosts your online visibility, increasing the chances of attracting employers and landing interviews.

9. Prove Your Skills: Projects & Final Exams

Cap off your journey by completing industry-relevant projects and final exams. These are designed to prove your capabilities and prepare you for real-world challenges in your chosen career path.

10. Continuous Job Support: We're With You Until You Land the Job

Even after the course our support doesn't stop. We offer continuous job placement assistance until you secure the right role. From job applications to interview scheduling, we're with you every step of the way until you find the perfect career match.

Program Syllabus

Introduction to CDEC

- How IT Company works [Different types of teams works on application]
- What is an application
- How application works [Scalability, Microservices vs Monolythic vs Serverless]
- Developers vs Tester vs DevOps Engineer
- Why DevOps? Realtime working
- Linux/Cloud/DevOps

Linux :

- What is Linux?
- Architecture of Linux
- Basic Commands in Linux.
- How to work with files and Editor
- File System Hierarchy
- Working with files and directories
- Redirectors in Linux
- User Administration
- Permission Management
- Archiving, Filtering and Job Scheduling
- Linux Package Management
- Linux Networking
- Process Management

AWS :

- What is Cloud Computing
- Traditional vs Cloud Hosting
- Cloud Architecture
- Foundation: IAM, Pricing Calculator
- Storage Service: S3, EBS, EFS
- Computing Services: EC2, ELB,
- Autoscaling Networking Services
- VPC, NAT, CDN, Route53 Monitoring
- CloudWatch, Container Insights
- Serverless: AWS Lambda
- Database Services: RDS, MongoDB

DevOps :

- What Application Development Life Cycle?
- What is Agile vs DevOps ?
- What is frontend vs backend ?

- What is API and their uses?
- Stages of Application Development
- Cloud Native Application

Source Code Management Tool :

- Git and GitHub/Gitlab/BitBucket
- Branching Strategies
- Deployment Strategies
- PR and Collaborations/Branch Protections

Containerization Tool : Docker

- Docker introduction
- Monolithic vs Microservices
- Containerization vs Virtualization
- Docker commands
- Writing docker file
- Docker Networking
- Docker Volume
- Deploy three-tier application on docker
- Docker Compose

Orchestration Tool : Kubernetes

- Architecture and Lifecycle of Kubernetes
- Deploy Kubernetes cluster using Kubeadm
- Deploy Kubernetes cluster using EKS
- Creating Kubernetes cluster using MiniKube
- Kubernetes Basic Commands
- Kubernetes Objects and Api-Versions
- Write manifest
- Kubernetes Networking
- Deploy Three-tier on Kubernetes

Monitoring tool : DataDog

- Introduction to Datadog
- DataDog Installation, setup and integrations.
- Configuring dashboards, metrics collection, and alerts.
- Logs Management with DataDog
- Infrastructure Monitoring

IAC-Infrastructure as a code : Terraform

- Introduction to Terraform
- Terraform Commands and Blocks
- Understand modules in Terraform
- State file Management

Creating Modules with Terraform

- Terraform provisioners and providers
- Dynamic Block, Variable and Conditions
- Datasource, Defining Conditions in Terraform
- Deploy three tier architecture in AWS using terraform

CICD Pipeline : Jenkins

- Create Jobs
- Installing plugins
- Create pipeline
- Master-slave node with ecs on farget
- Multibranch and parameterized pipelines
- GitHub Actions
- Terraform infra pipeline using Jenkins
- 3 tier pipeline using Jenkins

Python : OFFER

- Introduction to Python Programming
- Python Basics: Variables, Data Types, and Operators
- Control Flow in Python
- Data Structures in Python
- Functions and Modular Programming
- Exception Handling in Python
- File Handling and Data Management
- Automate AWS with Python

Projects :

- Deploying hybrid architecture [Serverless + Containerized] on EKS using Jenkins
- Deploying serverless application using lambda. API gateway, DynamoDB
- Deploying hybrid architecture [Serverless + Containerized] on EKS using GitHub actions.

Shell Script : OFFER

- Introduction to scripting
- Output and Input Commands
- Variables (Set and Unset)
- Command Line Argument
- Condition and Loop (for/while/if-else] SED, AWK
- SORT, UNIQ
- Host Website using Shell Script

Azure : OFFER

- Introduction to Azure Cloud
- Difference between Azure and AWS Cloud
- Foundation: Azure Administration And Active Directory
- Storage Services: Azure Storage
- Computing Services: Azure Virtual Machine
- Networking Services: Azure Virtual Networking
- Monitoring Services: Azure Monitoring

GCP : OFFER

- Introduction to GCP
- Compare GCP resources with AWS
- Foundation: GCP IAM
- Storage Services: Cloud Storage
- Computing Services: Compute Engine, Network Services
- Networking Services: VPC, NAT
- Monitoring Services: Cloud Monitoring And Logging

Course Projects

Projects cover the following industries:

Retail

Social Media

Supply Chain

Entrepreneurship

E-commerce Banking

Healthcare Insurance

Beginner

Deploy a Multi-Tier Website using AWS EC2

Launch and deploy applications on EC2 while ensuring cost-efficiency and scalability.

Beginner

Cross-Account S3 Bucket Sharing

Securely grant access to S3 buckets across AWS accounts for controlled data sharing.

Beginner

Build a Smooth Deployment Process with Jenkins

Automate application deployment by integrating Jenkins with Docker, Kubernetes, or cloud services.

Intermediate

Deploy Microservices using EC2, AutoScaling, and Load Balancer

Set up separate EC2 instances for microservices, configure Auto Scaling groups and use Elastic Load Balancer (ELB) for traffic distribution.

Intermediate

Create an Automated Scaling Mechanism for Compute Engines in GCP

Configure Google Cloud Platform's (GCP) Compute Engine instances to auto-scale based on CPU usage and demand.

Intermediate

Send Server Down Notifications to Manager

Use AWS CloudWatch to monitor server health, trigger SNS notifications and alert managers via email or SMS.

Intermediate

Create a Lambda Function for Disaster Recovery

Automate data backups and replication across AWS regions using Lambda and CloudWatch triggers.

Advanced

Automate Code Quality Analysis using SonarQube

Integrate SonarQube into the CI/CD pipeline for continuous code quality checks and reporting.

Advanced

Migrate a Database from On-Premises to the Cloud

Export, securely transfer, and import databases into a cloud environment for seamless migration.

Advanced

Enhance Security & Performance with SSL and CloudFront

Use Amazon CloudFront for CDN caching, Route 53 for low-latency DNS management and enable SSL/TLS encryption for enhanced security

Frequently Asked Questions

What are the terms and conditions to be eligible for the job opportunity program?

To avail the guaranteed job interviews, you'll have to:

Maintain attendance of at least 85% during the live classes for each phase of the program.

Submit all your course-end projects and capstone projects within 7 days of program completion.

Mandatorily submit all assignments, projects and case studies within the due timeline.

Successfully completed all the course modules along with at least 80% of the self learning videos.

Avoid malpractices during appearing for the test or assignment submission else you will be permanently disqualified from this program.

Candidates must clear the PRT (Placement Readiness Test) after the course completion to get into the placement pool and get access to our job portal as well as the career mentoring program.

What is expected from a candidate during the job assistance period?

The following is expected from the candidates during the job-assistance program:

Should give their 100% to secure a good job.

Attend all the career preparation sessions that are conducted.

Remain active in job search and apply to at least 30 jobs per month.

Once shortlisted for an interview, the candidate should go through the entire selection process.

Candidates should be open to relocation to the company's location.

Note : Failure to comply with any of the above will result in debarring from the placement process.

Frequently Asked Questions

What are the eligibility criteria for this program?

To be eligible for this program, you will need to meet the following criteria:

Hold a degree in B.E., B.Tech, B.Sc., BCA, M.E., M.Tech, M.Sc. or MCA.

Be a working professional up to 35 years of age.

Have a minimum of 50% marks throughout their academic journey (X, XII, Graduation, and Postgraduation).

Possess valid mark sheets and degree certificates for verification.

Be legally eligible to work in India.

Have a valid Aadhar Card and PAN Card.

Pass a background check from their previous employer/institution.

Note: Final-year students must submit all mark sheets & certificates up to their last semester (with at least 50%) and provide proof from their college mentioning the expected month and year of graduation.

What is the process of getting into the placement pool?

To qualify for the placement pool, candidates must:

Successfully complete the course along with the submission of all projects and assignments.

Clear the Placement Readiness Test (PRT) to gain access to the job portal and career mentoring program.

What are the eligibility criteria for the job opportunity program?

To avail guaranteed job interviews, candidates must:

Maintain 85% attendance in live classes.

Submit all course-end and capstone projects within 7 days of program completion.

Complete and submit all assignments, projects and case studies within the deadlines.

Successfully complete all course modules along with at least 80% of self-learning videos.

Avoid malpractices during tests or assignments, as violations will lead to permanent disqualification.

Clear the Placement Readiness Test (PRT) to enter the placement pool and gain access to job opportunities.

What is expected from candidates during the job assistance period?

During the job-assistance period, candidates are expected to:

Give 100% effort to secure a job.

Attend all career preparation sessions conducted by the program.

Actively apply to at least 30 jobs per month.

Go through the entire selection process if shortlisted for an interview.

Be open to relocating if required by the employer.

What happens if I fail to meet these requirements?

Failure to comply with any of the above conditions may result in disqualification from the placement process and removal from the job assistance program.
